SKILLS

Proficient in a variety of programming languages and web development technologies, including:

- PHP: Knowledgeable in server-side scripting and web application development.
- HTML/CSS: Expertise in creating visually appealing and standards-compliant web pages.
- Bootstrap 5: Experienced in leveraging the popular CSS framework for responsive and mobile-first web design.
- Laravel: Skilled in utilizing the Laravel PHP framework for rapid web application development.
- Laravel API: Experienced in building RESTful APIs using the Laravel framework.
- MySQL: Proficient in designing and managing relational databases.
- SQL Server: Competent in working with Microsoft's SQL Server database management system.
- GitHub: Experienced in utilizing the popular code hosting and collaboration platform.

Al-Mamoun Institute

EDUCATION

Bachelor's Degree in Software Engineering

Syrian Private University

2017 - 2022
- Completed a comprehensive curriculum covering topics such as programming, algorithms, software design, database management, and software testing

LANGUAGES

English

PROFILE

Experienced backend developer with a strong foundation in creating robust and efficient server-side applications. I excel at designing and implementing APIs, managing databases, and optimizing performance. Committed to staying current with the latest backend technologies and best practices, I am dedicated to delivering scalable and secure solutions. Eager to leverage my backend development expertise to contribute to a dynamic and innovative team.

EXPERIENCE

Darrebni Company   2024

- I have a Recommendation Letter by: Amr Droubi CEO of Darrebni company

2024

Darrebni Company

- I have successfully completed the online internship in Back-end Laravel. I have mastered the core concepts and practical skills of back-end development using the Laravel framework. This course has equipped me with the ability to build and maintain robust, scalable web applications.

EMBS Company   2024

- Web Development Diploma, (Back-End Laravel)

Al-Mamoun Institute   2020-2022

- Taught HTML and CSS programming languages to students at the Al-Mamoun Institute.
- Developed and delivered engaging lesson plans, hands-on exercises, and interactive workshops to foster students' understanding of web development fundamentals.
- Demonstrated a strong command of HTML and CSS, as well as the ability to effectively communicate technical concepts to learners of varying skill levels.

Al-Mamoun Institute   2020-2022

- Taught the C++ programming language to students at the Al-Mamoun Institute.
- Designed and implemented comprehensive lesson plans, quizzes, and projects to help students master the syntax, data structures, and algorithms of C++. Fostered a collaborative learning environment, providing one-on-one support and feedback to ensure students' progress and success.

ACM Participation   2019

- Actively participated in the Association for Computing Machinery (ACM) community, attending events, workshops, and networking opportunities.
- Gained exposure to the latest trends and best practices in the field of computer science and software engineering.

SYRA Robot   2018

- - Served as a coach for the Sira Robot program, guiding and mentoring students in the design, construction, and programming of robotic systems.
- - Fostered a hands-on learning environment, encouraging students to explore their creativity and problem-solving skills.

PROJECTS

Darbrni - Social Media Website.

Key Responsibilities and Achievements:
-Database Design and Modeling: Designed and implemented a scalable database schema using MySQL to efficiently store and manage user profiles, posts, comments, and other social interactions.
-Eloquent ORM Integration: Leveraged the Eloquent ORM provided by Laravel to streamline database interactions, allowing for intuitive query building and model management.
-RESTful API Development: Developed a robust RESTful API using Laravel's routing and controller features, enabling seamless communication between the front-end and back-end components.
-Authentication and Authorization: Implemented a secure authentication and authorization system, including user registration, login, and role-based access control, ensuring the privacy and security of the platform.
-Team Collaboration: Collaborated closely with a cross-functional team of developers, designers, and product managers to ensure the successful delivery of the project, adhering to agile methodologies and best practices. Continuous.
- Integration and Deployment: Implemented a robust continuous integration and deployment pipeline, enabling efficient code testing, building, and automated deployments to the production environment.
-Performance Optimization: Optimized the website's performance by implementing caching mechanisms, optimizing database queries, and leveraging techniques such as lazy loading and code minification.

To_DoList website.

Authentication and Authorization: Implemented a secure authentication and authorization system, including user registration, login, and session management, to ensure the privacy and security of the user data.
Task Management: Designed and implemented the core functionality of the to-do list, including the ability to create, update, mark as complete, and delete tasks. Provided users with features such as task prioritization, due dates, and task categorization.

Deployment and Hosting: Configured the deployment of the application on a cloud platform, ensuring scalability and high availability to handle increasing user traffic and data demands.

E-Commerce Website
- Designed and developed a full-featured e-commerce website using HTML, CSS, JavaScript, and Laravel.
- Implemented key functionalities such as product browsing, shopping cart, checkout process, and order management.
- Integrated a secure payment gateway to facilitate online transactions.
- Optimized the website for performance and mobile responsiveness.
Recommendation System
- Designed and implemented a content-based recommendation system using Laravel and collaborative filtering algorithms.
- Developed a web application that provides personalized product recommendations to users based on their browsing history and preferences.
- Utilized machine learning techniques to analyze user data and improve the recommendation accuracy over time

HOSEEN SHEIK AWAD

BACK-END DEVELOPER

PROJECTS

Invoicing Website

- Designed and built a comprehensive invoicing web application using Laravel.
- Developed features for creating, managing, and tracking invoices.
- Implemented functionality for generating custom invoices, applying discounts, and processing payments.
- Ensured data security and user-friendly interface for seamless invoicing workflows.

Gym Website
- Designed and developed a comprehensive website for a local gym using Laravel.
- Implemented features for membership management, class scheduling, and online registration.
- Created a responsive and visually appealing design to enhance the user experience.
- Integrated the website with a customer relationship management (CRM) system for efficient member data management.

Healthy Food Website

- Designed and built a website for a healthy food delivery service using the Laravel framework.
- Developed features for menu browsing, online ordering, and order tracking.
- Implemented a user-friendly interface with intuitive navigation and seamless checkout process.
- Integrated the website with a backend system for managing product inventory and order fulfillment.
